

The 2010 Census is about to begin, and the country needs **YOUR** help to make it a success!

How does the census help your community?

First, the census data is not used for immigration purposes, and it is **completely confidential**. The information the census collects helps to determine how more than **\$400 billion** of federal funding each year is spent on infrastructure and services like:

- Hospitals
- Job training centers
- Schools
- Senior centers
- Bridges, tunnels and other-public works projects
- Emergency services

In order to receive this funding in your neighborhood it is **essential** that members from your community complete the Census. Don't wait another 10 years to be counted!

How can you support the Census?

You can become an official Census 2010 Question Site, where census takers can assist people with answering the Census questions. Here are the details in becoming a Question Site:

- You work during your normal hours; and you decide the time limits
- The census taker is provided by the government and only needs space to interview the client
- There are only 10 questions- a quick and easy survey
- It would be a great benefit to clients that are illiterate who are afraid for any reason

How do you become an official Census 2010 Question Site?
